Unlocking sustained value from gold deposits

About the conference

The World Gold Conference series is a joint venture between The Australasian Institute of Mining and Metallurgy (The AusIMM), the Southern African Institute of Mining and Metallurgy (SAIMM) and the Canadian Institute of Mining, Metallurgy and Petroleum (CIM).

World Gold will include all aspects of gold mining, including exploration, geosciences, mining (including geotechnical aspects), metallurgy (processing), environment and related themes.

Due to the diversity of gold mining interest, various workshops will be incorporated within the program. World Gold will be preceded by MetPlant 2019 on 9 and 10 September in the same venue. Take advantage of these two leading back-to-back conferences and have your company represented at both events.

Conference Themes

- Pre-concentration and coarse particle gangue rejection
- Gold ore characterisation approaches for a new era of processing
- Innovative mining practices/developments
- Pre-oxidation of refractory ores
- Sensors, monitoring and control
- Mineralogy and characterisation
- Exploration of new gold deposits
- Gold mine optimisation (mining, processing and exploration)
- Water in the modern gold mine: enhancing quality, managing chemistry and targeting less intensive usage options
- New developments in comminution (crushing and grinding)
- Economic design and modelling of comminution circuits
- Process flowsheet optimisation
- Filtered tailings and mitigation of tailings dam risks
- Life of mine (mine closure, community engagement, etc.)
- Digital transformation / industry 4.0
- Geology on orogenic gold deposits

Call for abstracts open

Abstract submissions for World Gold 2019 are now open. Please submit your abstract via the online speaker portal: worldgold.ausimm.com

 **DUE**
09 OCT
2018

For more information, including keynote speakers and conference themes, visit worldgold.ausimm.com

WORLD GOLD CONFERENCE

PERTH
11-13 SEPT 2019

#worldgold2019

Speakers

Bill Beament
Executive Chairman,
Northern Star

Daniel van der Spuy
Technical Director,
Process IQ Pty Ltd

Elizabeth Lewis-Gray
Chairman and Managing
Director, Gekko Systems

Mark Clark
Executive Chairman,
Regis Resources Limited

Simon Hille
VP Global Innovation,
Process & Metallurgy
for Goldcorp

Dr Steve Morrell
SMC Testing Pty Ltd

Dr Vanessa Guthrie
Chair, Minerals Council
of Australia

Prof JJ Eksteen
Chair, Extractive
Metallurgy, WA School
of Mines
